

### **TRIBAL ATTORNEY'S CALL 11/19/19**

#### **DB project – in situ recovery of uranium**

- Location – relative to Black Hills. Link in invitation will bring you to website. The map of the location is on p. 11 of the Class III permit fact sheet
- Size – over 10,000 acres
- Process of injection and recovery
- 14 wellfields, each with hundreds of wells possible
- Describe EPA's 3 actions: 1) Class III permit; 2) Aquifer exemption associated with the Class III permit; 3) Class V permit – this is the 2<sup>nd</sup> round of draft actions – after 1<sup>st</sup> round, EPA made changes and determined that it would be best to do a 2<sup>nd</sup> round of public comment.
- Tribal consultation – in the first round of drafts, we reached out to all the tribes in R8 to offer consultation and also reached out to 11 additional tribes that have historic ties to the area.
- The documents associated with these actions were issued in August for public comment. The comment period is open until: Dec 09, 2019 11:59 PM ET
